DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 12, 13, 22, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by DE-1169218 (DE'218).

Re: claims 1, 12, 13, and 22. DE'218 shows in the figure a self-energizing brake assembly, as disclosed on pg. 3 of the translation in which it describes the brake force being amplified, comprising: a support 17,19 pivotally mounted at an angle relative to a rotatable brake member 3, an adjustable member 27 biasing the support toward the rotatable brake wherein the adjustable member comprises a compliant member as shown, and a friction member 23,25 pivotally mounted relative to the support and slideable in a rotational manner along the support between engaged and disengaged positions with the rotatable member to generate a braking force between the friction member and the rotatable member wherein the angle of the support is variable for controlling a self-energizing gain in the braking force.

Re: claim 23. DE'218 shows in the figure the limitation wherein the support is pivotally mounted relative to the rotatable member at a pivot 15 and wherein a frictional force generated between the friction member and the rotatable brake member slides the

friction member 23,25 along the support 17,19 as the friction member pivots around 21 moving friction member 23,25 (to the right) toward the pivot 15.

Response to Amendment

3. The finality of the action mailed 4/15/09 is withdrawn in light of DE'218 as translated and an alternate interpretation of the reference.

Response to Arguments

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. It is noted, however, that the amendments as entered overcome the rejections using the Trinh reference.
